

| Key Vocabulary      |   |
|---------------------|---|
| <b>dam</b>          | A barrier that blocks off flowing water.  |
| <b>fertiliser</b>   | A substance that helps make plants grow.  |
| <b>particles</b>    | Everything is made up of matter. <b>Particles</b> are tiny bits of matter.                                |
| <b>pesticides</b>   | A substance used to destroy pests such as small animals, insects and weeds.                               |
| <b>pollution</b>    | Anything that is introduced into a habitat which has a harmful effect on plants and animals living there. |
| <b>reservoir</b>    | A man made lake that is used to store water.  |
| <b>water vapour</b> | Water that is in the form of a gas.   |

| Changing State  |   |   |  |
|---|---|---|--|
| Evaporation   | Condensation  | Melting   | Freezing   |
| Evaporation occurs when a liquid changes into a gas or <b>water vapour</b> .  | Condensation is when a gas cools and changes to a liquid.  | This is when a solid is heated and changes to a liquid.  | Freezing is the process of a liquid cooling and changing to a solid.  |

Clouds form when warm, moist air is cooled. When it is cooled, it condenses into tiny water droplets which appear as clouds.

Heat from the sun evaporates water, which rises, condenses in the cool air and then falls back down to earth.

| Treating Water   |   |   |  |   |
|--|---|---|--|---|
|  |  |  |  |  |
| Water is stored in <b>reservoirs</b> to allow solids to settle at the bottom.    | Chemicals are added to help remove small <b>particles</b> .                       | Water passes through gravel and carbon to filter out tiny <b>particles</b> .      | Chlorine is added to kill off bacteria.  | Water is clean and safe to drink.   |

| Flooding   |  |   |  |
|--|--|---|--|
| Fluvial  | Pluvial  | Coastal   | Plumbing   |
|   |  |  |  |
| Lots of rainfall causing rivers to burst their banks.  | Heavy rainfall cannot drain away quickly enough.                                   | High tides and storms.  | Broken pipes in buildings.   |
| Flooding can be prevented in some areas by building <b>dams</b> and flood barriers. However, blocking a river at one location can cause flooding further up or downstream. |  |   |  |

### Pollution

- Chemicals – can poison animals.
- Litter – can be ingested by animals or trap them.
- **Fertilisers** – can cause a lack of oxygen and kill animals.

### Reducing Pollution

- Be careful what you throw down the sink or toilet.
- Don't throw litter into lakes, rivers or oceans.
- Use environmentally-friendly household cleaning products.
- Have more plants in the garden to stop contaminated water running into the water supply.
- Don't over use **fertilisers** or **pesticides**.

### Marine Protection and Conservation Areas

- Just under 25% of the UK coastal waters are protected.
- Over 6,500 species of plants and animals are found here.
