

# YEAR 5 ADVENT 1

LOVE OF GOD | LOVE OF ONE ANOTHER | LOVE OF LIFE ITSELF

## PE

This term we have PE every Monday and Friday. Please come to school in PE kit on these days and ensure earrings are removed.

## Art - Sailing Boats

This term we will learning about street art. We will explore the work of Banksy and Haring and create our own work using stencils inspired by these great artists.

## Geography - Enough for Everyone

In our Geography work this term we are learning about what we need to survive and where our food and energy come from. We will learn about how to ensure we only use our fair share and how we can take care of our planet through responsible use of energy.

## Dear Parents,

Welcome to our Advent term and the start of Year Five. We hope you had a restful half summer break and were able to get some fun and rest

Please find alongside this term's newsletter the knowledge organisers for this term's learning linked to our topic areas. Please take the time to share these with your child and discuss the knowledge and vocabulary they will be learning as we journey towards Christmas.

Alongside this you will be able to find useful information on our class website page and up and coming events this term on our events calendar, emailed last term and can also be found on the calendar dates area of the website.

## RE – Covenant and Creation

This term we are learning about what a covenant is and will be exploring some of the covenants from the Bible. We will explore the ten commandments and consider why it is important we live by these today.

## Maths – Place value

This term we will be learning about place value with numbers up to one million. We will know the value of each digit and later use that knowledge to add and subtract increasingly large numbers.

## Homework.

Children will have a weekly booklet for their homework focusing on previous, current and future learning in class. Answers will be printed with their homework. The answers are there to provide a talking point should your child need extra support to solve a question. The answer to a maths question is a great talking point to start calculating different ways to achieve the same answer. Please also find useful links for maths games and resources on the weekly school newsletter and the maths area of the website.

If you have any questions, please don't hesitate to contact the school office or see to me on the playground at the end of the school day.

Kindest Regards,

Mr Gilbert

Year 5 Class Teacher
